

Summer Schools 2013

- in innovation and entrepreneurship

For international students, and students from UCPH, DTU and CBS

Long summer holidays can be great, although at some point we might get tired of rain, watching TV, working or playing chess in a summer house. But don't worry – here's a chance to do something fun while gaining ECTS points!

Summer schools challenge your academic field by letting you apply theories and knowledge on real-world problems. The courses are intensive, cross-disciplinary and teach you to think innovatively and how to turn good ideas into reality.

5-7,5 ECTS / August 12 to 30

DIGITAL SERVICES IN HEALTHCARE

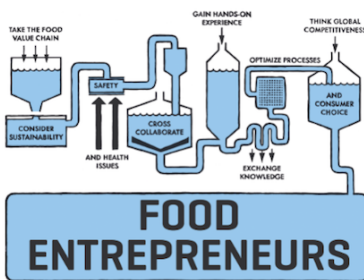

Digital Services Innovation

The healthcare system is feeling the weight of an ageing population, a continuous growth in chronic conditions and greater time pressure. Digital Services Innovation is needed in order to solve these numerous and complex challenges!

Join this summer school in which lectures, workshops, and prototyping work is mixed. You will work in interdisciplinary groups to design innovative digital services based on cases given by external organizations.

5 ECTS / August 5 to 23

Food Entrepreneurs

The Danish food industry successfully works with academics when developing new products. Maybe you can contribute with your knowledge too!

During this summer school, you'll learn how to develop an idea into a final product with a clear market share and a ready-to-go business plan. All cases are related to the food sector, and will be based on food ingredients, raw materials, new values in food production or equipment design.

Please note: **Deadlines** for applications are in May and June and vary depending on your university. See detailed information on the webpage.

GREEN INNOVATION IN CITIES

Join the courses this fall

Green Innovation in Cities is an interdisciplinary program focusing on how we can develop innovative and green solutions to the challenges of urban growth.

[Keep an eye](#) on the upcoming courses in the fall.

SUMMER SCHOOL 2013 INNOVATION INSPIRED BY NATURE

Innovation Inspired by Nature
Apply before **May 2**

Nature is the source of inspiration in [Katapult's summer school](#). Focus is on the newest theories and methods from the fields of innovation, entrepreneurship, bionics, evolution, design, communication and team dynamics. Working in interdisciplinary teams, you'll find solutions to cases provided by external companies.

7,5 ECTS / course in August
